

Peak temperature and time to peak, per cell

| Cell | Peak temperature<br>K | Peak rise above coolant<br>K | Time to peak<br>s | Uncertainty on the peak<br>K |
|------|-----------------------|------------------------------|-------------------|------------------------------|
| 1    | 293.419751            | 0.419751                     | 900               | not established              |
| 2    | 293.309239            | 0.309239                     | 900               | not established              |
| 3    | 293.309239            | 0.309239                     | 900               | not established              |
| 4    | 293.309239            | 0.309239                     | 900               | not established              |
| 5    | 293.309239            | 0.309239                     | 900               | not established              |
| 6    | 293.309239            | 0.309239                     | 900               | not established              |
| 7    | 293.309239            | 0.309239                     | 900               | not established              |
| 8    | 293.419751            | 0.419751                     | 900               | not established              |

Uncertainty is not established on a single mesh and a single time step. No error bar is quoted.
