Sanaa Mouzahir

Dear Sanaa,

We are delighted to share that you have been selected to receive a 2025-2026 MathWorks Mechanical Engineering Fellowship. Congratulations!

In selecting your application among an outstanding cohort, we noted your exceptional accomplishments in graduate school, integral use of MathWorks software in your research, and promise for future achievements.

The fellowship will provide 100% coverage of stipend, tuition, and graduate student health insurance for the Fall 2026 and Spring 2027 terms. The total value (including full tuition) is approximately \$114,500.

Please reply to Saana McDaniel (saana@mit.edu) to confirm that you accept the fellowship, and/or reach out with any questions.

During the year, we may also ask you to provide a brief report on your accomplishments as a MathWorks fellow, and we hope you will participate in a MathWorks fellows poster session as part of another MechE event such as the de Florez Competition (details to come).

All the best for a successful and fulfilling year to come, and congratulations again.

Sincerely,

A. John Hart
Class of 1922 Professor
Department Head

Ellen Roche
Abby Rockefeller Mauzé Professor
Associate Department Head for Research
