

Peak temperature and time to peak, per cell
 Volume-averaged over the 120 mesh cells of each cell; coolant reference temperature 293.000000 K

Cell	Peak temperature K	Peak rise above coolant K	Time to peak s	Uncertainty on the peak K
1	293.419751	0.419751	900	not established
2	293.309239	0.309239	900	not established
3	293.309239	0.309239	900	not established
4	293.309239	0.309239	900	not established
5	293.309239	0.309239	900	not established
6	293.309239	0.309239	900	not established
7	293.309239	0.309239	900	not established
8	293.419751	0.419751	900	not established

Uncertainty column: not established from this configuration. One mesh and one time step were run in this arm, so no discretisation error estimate is available. Each value above is the field as computed, not a value carrying a measured error bar. The peak is the largest of 181 samples taken every 5 s, so the time to peak is resolved to 5 s.
