

The sixteen solved points, with units

Power [W]	Airspeed [m s ⁻¹]	Peak temperature [°C]	Rise above inlet [K]	Margin to 200 °C [K]	Numerical uncertainty [K]
80	10	38.1374	23.2874	+161.8626	not available
80	20	29.0795	14.2295	+170.9205	not available
80	30	25.5462	10.6962	+174.4538	not available
80	40	23.5897	8.7397	+176.4103	not available
155	10	59.9609	45.1109	+140.0391	not available
155	20	42.3896	27.5396	+157.6104	not available
155	30	35.5104	20.6604	+164.4896	not available
155	40	31.6747	16.8247	+168.3253	not available
230	10	81.7844	66.9344	+118.2156	not available
230	20	55.6997	40.8497	+144.3003	not available
230	30	45.4746	30.6246	+154.5254	not available
230	40	39.7598	24.9098	+160.2402	not available
305	10	103.6078	88.7578	+96.3922	not available
305	20	69.0098	54.1598	+130.9902	not available
305	30	55.4389	40.5889	+144.5611	not available
305	40	47.8448	32.9948	+152.1552	not available

Numerical uncertainty column: not available - single grid, no grid-refinement error estimate.

All sixteen points were solved on one grid. A discretisation error bar needs a refinement study; none was run, so none exists for any row and none is estimated, interpolated or borrowed here.
